Subject: Microsoft Settlement

Hello,

As a computer professional, I would just like to say that I am in favor of RedHat's proposal to give away it's Linux operating system for free to school districts and make Microsoft pay for the hardware. In addition, none of the hardware should be made by Microsoft (Microsoft mice/keyboards,etc).

The RedHat proposal can be found on RedHat's website at:

https://www.redhat.com/about/presscenter/2001/press_usschools.html

Regards,
David
